VOLUME VIII.

SUBJECT INDEX.

Address.

Annual — by the President, Charles B. Dudley, 19.

Alkali Water.

Cement and Concrete Work of the U. S. Reclamation Service, with Notes on Disintegration of Concrete by Action of —. J. Y. Jewett, 480.

Alloys.

Characteristic Results of Endurance Tests on Wrought Iron, Steel, and —. Henry Souther, 379.

American Society for Testing Materials.

Advisory Committees, 678.

Annual Report of the Executive Committee of the—, 679.

Officers, Members of the Executive Committee, and Standing Committees of the —, 676.

Past Officers of the —, 677.

Analysis.

The — of Oil Varnishes. P. C. McIlhiney, 596.

Paint —. P. H. Walker. Report of Committee E, Appendix I, 173.

Paint —. P. C. McIlhiney. Report of Committee E, Appendix II, Plates IV–VI, 178.

Autographic Recorder.

An — for Rapid Tension Testing. H. F. Moore, 653.

Beams.

Some Tests of Reinforced Concrete — under Oft-Repeated Loading. H. C. Berry, 454.

Tests of Bond in Reinforced Concrete —. M. O. Withey, 469.

Boilers.

Uniform Specifications for —. Report of Committee R, 214. Discussion, 219.

Bond.

Tests of — in Reinforced Concrete Beams. M. O. Withey, 469.

Brick.

The Influence of the Absorptive Capacity of — on the Adhesion of Mortar. D. E. Douty and H. C. Gibson, 518. Discussion, 531.

Bronze.

Manganese —, C. R. Spare, 391. Discussion, 395.

Cast Iron.

Standard Specifications for — and Finished Castings. Report of Committee B, 143.

Cement (see also **Concrete**).
— and Concrete Work of the U. S. Reclamation Service, with Notes on Disintegration of Concrete by Action of Alkali Water. J. Y. Jewett, 480.
Hydrated Lime and — Mortars. E. W. Lazell, 418.
Standards for Portland —, Especially for the Tensile Strength. W. W. Maclay, 423.
Standard Specifications for —. Report of Committee C, 149.
The Influence of Fine Grinding on the Physical Properties of Portland —. R. K. Meade, 408.

Chill.
Method of Obtaining a Truly Circular and Uniform — in Rolls. T. D. West, 386.

Coal (see also **Fuel**).
Commercial Results in the Purchase of — on Specifications. J. E. Woodwell, 582.

Columns.
Preliminary Program of Tests of Steel — to be Executed at U. S. Watertown Arsenal, 282. Discussion, 299.
Some Results of the Tests of Steel — in Progress at Watertown Arsenal. J. E. Howard, 336.

Combined Stresses.
Results of Tests of Materials Subjected to —. E. L. Hancock, 373.

Committee Reports.
Committee A, on Standard Specifications for Iron and Steel, 40.
Committee B, on Standard Specifications for Cast Iron and Finished Castings, 143.
Committee C, on Standard Specifications for Cement, 146.
Committee E, on Preservative Coatings for Iron and Steel, 165.
Committee F, on Heat Treatment of Iron and Steel, 184.
Committee G, on the Magnetic Properties of Iron and Steel, 190.
Committee H, on Standard Tests for Road Materials, 196.
Committee I, on Reinforced Concrete, 201.
Committee K, on Standard Methods of Testing, 202.
Committee P, on Fireproofing Materials, 206.
Committee Q, on Standard Specifications for the Grading of Structural Timber, 213.
Committee R, on Uniform Specifications for Boilers, 214. Discussion, 219.
Committee S, on Waterproofing Materials, 221.
Committee T, on the Tempering and Testing of Steel Springs and Standard Specifications for Spring Steel, 224. Discussion, 229.
Committee U, on the Corrosion of Iron and Steel, 231.

Concrete (see also **Cement**).
Cement and — Work of U. S. Reclamation Service, with Notes on Disintegration of — by action of Alkali Water. J. Y. Jewett. 480.

Concrete (Continued).
Permeability Tests of — with the Addition of Hydrated Lime. S. E. Thompson, 500.
Report of Committee I on Reinforced —, 201.
Sands: Their Relation to Mortar and —. H. S. Spackman and R. W. Lesley, 429. Discussion, 449.
Shearing Values of Stone and — . H. H. Quimby, 494.
Some Tests of Reinforced — Beams under Oft-Repeated Loading. H. C. Berry, 454.
Tests of Bond in Reinforced — Beams. M. O. Withey, 469.
Tests of Reinforced — Block Sewer and Railway Culverts. Burton Lowther, 514.
Copper Wire.
Notes on the Desirability of Standard Specifications for Hard-Drawn Copper Wire. J. A. Capp and W. H. Bassett, 397. Discussion, 401.
Corrosion.
Electrolysis and —. A. S. Cushman, 238.
General Discussion on —, 266.
Report of Committee U, on the — of Iron and Steel, 231.
The Inhibitive Power of Certain Pigments on the — of Iron and Steel. A. S. Cushman. 605.
The Relative — of Steel and Wrought Iron Tubing. H. M. Howe and Bradley Stoughton, 247.
Culverts.
Tests of Reinforced Concrete Block Sewer and Railway —. Burton Souther, 514.
Drop Test.
Some Results Showing the Behavior of Rails under the —, and Proposed New Form of Standard Drop Testing Machine. S. S. Martin, 128.
Electrolysis.
— and Corrosion. A. S. Cushman, 238.
Endurance Tests.
Characteristic Results of — on Wrought Iron, Steel, and Alloys. Henry Souther, 379.
Extensometer.
The Use of an — in Commercial Work. T. D. Lynch, 640. Discussion, 652.
Fine Grinding.
The Influence of — on the Physical Properties of Portland Cement. R. K. Meade, 408.
Fireproofing.
Report of Committee P on — Materials, 206.
Standard Test for — Floor Construction, 210.
Floor Construction.
Standard Test for Fireproof —, 210.

Forest Service.
— Tests to Determine the Influence of Different Methods and Rates of Loading on the Strength and Stiffness of Timber. McGarvey Cline, 535.

Fuel (see also **Coal**).
— Investigations, Geological Survey: Progress during the Year Ending June 30, 1908. J. A. Holmes, 576.

Geological Survey, U. S.
Fuel Investigations, — : Progress during the Year Ending June 30, 1908. J. A. Holmes, 576.
The Structural Materials Laboratories, — : Progress during the Year Ending June 30, 1908. R. L. Humphrey, 403.

Heat Treatment.
— of Iron and Steel. Report of Committee F, 184.

Hydrated Lime.
— and Cement Mortars. E. W. Lazell, 418.
Permeability Tests of Concrete with the Addition of —. S. E. Thompson, 500.

Ingotism.
Can — be Cured by Prolonged Exposure to the Temperature at which Overheating is Cured? H. M. Howe, William Campbell, and W. T. Koken. Report of Committee F, 185.

Inspection.
Testing is not —. W. A. Aiken, 611. Discussion, 617.

Iron.
Characteristic Results of Endurance Tests on Wrought —, Steel, and Alloys. Henry Souther, 379.
Corrosion of — and Steel. Report of Committee U, 231.
Heat Treatment of — and Steel. Report of Committee F, 184.
Magnetic Testing of — and Steel. Report of Committee G, 190.
Preservative Coatings for — and Steel. Report of Committee E, 165.
Standard Specifications for Cast — and Finshed Castings. Report of Committee B, 143.
Standard Specifications for — and Steel. Report of Committee A, 40.
The Inhibitive Power of Certain Pigments on the Corrosion of — and Steel. A. S. Cushman, 605.
The Relative Corrosion of Steel and Wrought — Tubing. H. M. Howe and Bradley Stoughton, 247.

Lime.
See **Hydrated Lime.**

Lubricating Oils.
Testing —. Henry Souther, 493.

Macadam Rock (see also **Stone, Road Materials**).
Standard Toughness Test for —, 199.

Magnetic Testing.
The — of Iron and Steel. Report of Committee G, 190.
Uniformity in — and in the Specification of Magnetic Properties. C. W. Burrows, 658. Discussion, 667.

Manganese Bronze.
— C. R. Spare, 391. Discussion, 395.

Manganese Sulphide.
A Microscopic Investigation of Broken Steel Rails:— as a Source of Danger. Henry Fay, 74.

Metallography.
Some Practical Applications of —. William Campbell, 345. Discussion, 359.

Methods of Testing.
Standard —. Report of Committee K, 202.

Mortar.
Hydrated Lime and Cement Mortars. E. W. Lazell, 418.
Sands: Their Relation to — and Concrete. H. S. Spackman and R. W. Lesley, 429. Discussion, 449.
The Influence of the Absorptive Capacity of Brick on the Adhesion of —. D. E. Douty and H. C. Gibson, 418. Discussion, 431.

Oils.
Testing Lubricating —. Henry Souther, 593.

Pacific Coast.
The Structural Timbers of the —. Rolf Thelen, 558.

Paint.
— Analysis. Report of Committee E, Appendix I, P. H. Walker, 173.
— Analysis. Report of Committee E, Appendix II, P. C. McIlhiney. Plates IV–VI, 178.

Permeability.
— Tests of Concrete with the Addition of Hydrated Lime. S. E. Thompson, 500.

Pendulum Testing Machine.
New Forms of —. T. Y. Olsen, 636.

Pigments (see also **Paint, Preservative Coatings, Protective Coatings**).
The Inhibitive Power of Certain — on the Corrosion of Iron and Steel. A. S. Cushman, 605.

Portland Cement.
See **Cement.**

Preservative Coatings (see also **Paint, Pigments, Protective Coatings**).
Report of Committee E on — for Iron and Steel, 165.

President's Address.
See **Address.**

Proceedings.
Summary of — of the Tenth Annual Meeting, 7.

Protective Coatings (see also **Pigments, Preservative Coatings**).
Certain Solubility Tests on —. G. W. Thompson, 601.
Rails.
A Microscopic Investigation of Broken Steel —: Manganese Sulphide as a Source of Danger. Henry Fay, 74.
General Discussion on Steel —, 109.
Some Features of the Present Steel Rail Situation. Charles B. Dudley, 19.
Some notes on the Rail Situation. E. F. Kenney, 99.
Some Results of the Tests of Steel — in Progress at Watertown Arsenal. J. E. Howard, 53.
Some Results Showing the Behavior of — under the Drop Test, and Proposed New Form of Standard Drop-Testing Machine. S. S. Martin, 128.
Standard Specifications for Steel —, 44.
Rail Failures, Mashed and Split Heads. M. H. Wickhorst, 94.
Reclamation Service, U. S.
Cement and Concrete Work of —, with Notes on Disintegration of Concrete by Action of Alkali Water. J. Y. Jewett, 480.
Reinforced Concrete.
See **Concrete.**
Repeated Loading.
Some Tests of Reinforced Concrete Beams under Oft- —. H. C. Berry, 454.
Road Materials.
Standard Abrasion Test for —, 197.
Standard Tests for —. Report of Committee H, 196.
The Acceptance of Stone for Use on Roads Based on Standard Tests. R. S. Greenman, 568. Discussion 573.
Rock.
Standard Toughness Test for Macadam —, 199.
Rolls.
Method of Obtaining a Truly Circular and Uniform Chill in —. T. D. West, 386.
Sands.
—: Their Relation to Mortar and Concrete. H. S. Spackman and R. W. Lesley, 429. Discussion, 449.
Sewer Culverts.
See **Culverts.**
Shearing.
— Values of Stone and Concrete. H. H. Quimby, 494.
Solubility Tests.
See **Tests.**
Specifications.
Commercial Results in the Purchase of Coal on —. J. E. Woodwell, 582.

Specifications (Continued).
Notes on the Desirability of Standard — for Hard-Drawn Copper Wire. J. A. Capp and W. H. Bassett, 397. Discussion, 401.
Standard — for Cement, 149.
Standard — for Steel Rails, 44.
Speed.
The Effect of the — of Testing upon the Strength of Wood and the Standardization of Tests for —. H. D. Tiemann, 541.
Springs.
Tempering and Testing of Steel — and Standard Specifications for Spring Steel. Report of Committee T, 224. Discussion, 229.
Standard Specifications.
See **Specifications.**
Standard Tests.
See **Tests.**
Staybolts.
Tests of —. E. L. Hancock, 369.
Steel.
A Microscopic Investigation of Broken — Rails: Manganese Sulphide as a Source of Danger. Henry Fay, 74.
Characteristic Results of Endurance Tests on Wrought Iron —, and Alloys. Henry Souther, 379.
Corrosion of Iron and —. Report of Committee U, 231.
General Discussion on — Rails, 109.
Heat Treatment of Iron and —. Report of Committee F, 184.
Preliminary Program of Tests of — Columns to be Executed at U. S. Watertown Arsenal, 282. Discussion, 299.
Preservative Coatings for Iron and —. Report of Committee E, 165.
Some Results of the Tests of — Columns in Progress at Watertown Arsenal. J. E. Howard, 336.
Some Results of the Tests of — Rails in Progress at Watertown Arsenal. J. E. Howard, 53.
Standard Specifications for Iron and—. Report of Committee A, 40.
The Inhibitive Power of Certain Pigments on the Corrosion of Iron and —. A. S. Cushman, 605.
The Magnetic Testing of Iron and —. Report of Committee G, 190.
Tempering and Testing of — Springs and Standard Specifications for Spring —. Report of Committee T, 224. Discussion, 229.
The Relative Corrosion of — and Wrought Iron Tubing. H. M. Howe and Bradley Stoughton, 247.
Stone.
Shearing Values of — and Concrete. H. H. Quimby, 494.
The Acceptance of — for Use on Roads Based on Standard Tests. R. S. Greenman, 568. Discussion, 573.
Stresses.
Effect of Combined — on the Elastic Properties of Steel. E. L. Hancock, 373.

Testing (see also **Tests** and **Testing Machine**).
An Autographic Recorder for Rapid Tension —. H. F. Moore, 653.
Standard Methods of —. Report of Committee K, 202.
Tempering and — of Steel Springs. Report of Committee T, 224. Discussion, 229.
— is not Inspection. W. A. Aiken, 611. Discussion, 617.
— Lubricating Oils. Henry Souther, 593.
The Effect of the Speed of — upon the Strength of Wood and the Standardization of Tests for Speed. H. D. Tiemann, 541.
The Magnetic — of Iron and Steel. Report of Committee G, 190.
The Structural Materials — Laboratories, U. S. Geological Survey: Progress during the Year Ending June 30, 1908. R. L. Humphrey, 403.
Uniformity in Magnetic — and in the Specification of Magnetic Properties. C. W. Burrows, 658. Discussion, 667.

Testing Machine.
Some Results Showing the Behavior of Steel Rails under the Drop Test, and Proposed New Form of Standard Drop —. S. S. Martin, 128.
Notes on the History of Testing Machines, with Special Reference to European Practice. J. H. Wicksteed, 620.
Special Features of a Recently Installed 600,000-lb. Universal —. T. Y. Olsen, 626.
New Forms of Pendulum Testing Machines. T. Y. Olsen, 636.

Tests (see also **Testing**).
Certain Solubility — on Protective Coatings. G. W. Thompson, 601.
Characteristic Results of Endurance — on Wrought Iron, Steel, and Alloys. Henry Souther, 379.
Forest Service — to Determine the Influence of Different Methods and Rates of Loading on the Strength and Stiffness of Timber. McGarvey Cline, 535.
Permeability — of Concrete with the Addition of Hydrated Lime. S. E. Thompson, 500.
Preliminary Program of — of Steel Columns to be Executed at U. S. Watertown Arsenal, 282. Discussion, 299.
Results of — of Materials Subjected to Combined Stresses. E. L. Hancock, 373.
Some Results of the — of Steel Columns in Progress at Watertown Arsenal. J. E. Howard, 336.
Some Results of the — of Steel Rails in Progress at Watertown Arsenal. J. E. Howard, 53.
— of Staybolts. E. L. Hancock, 369.
Some — of Reinforced Concrete Beams under Oft-Repeated Loading. H. C. Berry, 454.
Standard Abrasion Test for Road Materials, 197.
Standard Test for Fireproof Floor Construction, 210.

Tests (Continued).
Standard Toughness Test for Macadam Rock, 199.
— of Bond in Reinforced Concrete Beams. M. O. Withey, 469.
The Acceptance of Stone for Use on Roads Based on Standard —. R. S. Greenmann, 568. Discussion, 573.
Timber.
Forest Service Tests to Determine the Influence of Different Methods and Rates of Loading on the Strength and Stiffness of —. McGarvey Cline, 535.
Standard Specifications for the Grading of Structural —. Report of Committee Q, 213.
The Effect of the Speed of Testing upon the Strength of Wood and the Standardization of Tests for Speed. H. D. Tiemann, 541.
The Structural Timbers of the Pacific Coast. Rolf Thelen. 558.
Varnishes.
The Analysis of Oil —. P. C. McIlhiney, 596.
Waterproofing.
Report of Committee S on — Materials, 221.
Watertown Arsenal.
Preliminary Program of Tests of Steel Columns to be Executed at —, 282. Discussion, 297.
Some Results of the Tests of Steel Columns in Progress at —. J. E. Howard, 336.
Some Results of the Tests of Steel Rails in Progress at —. J. E. Howard, 53.
Wire.
